On the first floor

On the first floor in spanish. On the first floor or in the first floor.

The first floor of the white house residence is often called "state of state" because it is where formal state receptions are performed. This floor is on the highest terrain. This floor has 8 bedrooms, 1 main corridor, 1 entrance hall. The ceilings are 18 height, except for the entrance hall, where it is 19 height, and the east room, where it has more than 20 meters high. Usher's office, and the first floor mezzanine on the butler's pantry. hotspot on the plane to visit the living room or continue your ride with western wing or continue your turning with another floor above that is called a second floor and so on. Why the difference? This is my theory: the deadline does not have to be qualified, there is such a thing as an ⠀ "fundamental à ¢ â €" while any builder can have one or more floors or floor trey in the USA, the first floor of a premium is also rodo floor, but in Europe The first floor is the floor above the floor trey, and the second floor is that above that. This is an important information for Novice American travelers trying to find their hotel rooms. Common Paul Brians Errors in use in English! An American Native Speaker in the word reference writes that we use "TÃ © rreo" and "first floor" interchangeable. If you climb a bid of stairs, you reach the second floor, if you call the floor you started in the icy or at first. Similarly in a different English tongue fan, a native speaker confirms in the USA \tilde{A} \hat{a} \in " \tilde{A} $\hat{\epsilon}$ " \tilde{A} $\hat{\epsilon}$ " \tilde{A} $\hat{\epsilon}$ " \tilde{A} $\hat{\epsilon}$ $\hat{\epsilon}$ € Sometimes they go Say "~ â €" â € "a €", which is represent to â € " a €" a € "but still means â € " ¬ ¬ "Basement â € ‡.) Let's take a look at a small but important difference in British English. The floor of a street on the street level is called Terre. The floor above is the first floor and the floor below is called a portion. In American English, however, the Chão on the street level is usually called the first floor (which, of course, is the first floor for the Britchers). The AND Air below the street level is usually called the portion, the same as in British English. One or two of my American friends tell me that in public buildings in the US it is also possible to call the floor of street level the trello floor, like in the gran. Storey, Storeys / Story, stories Another important word to consider here is to walk. This word describes the level (height) of a builder and the total number of your floors. So we say that a premium has eight floors, or is an eight-story building (NAfâ € £ o forget there, please!) Gustave Eiffel would use it to get to the office that he had become obsolete, the staircase was withdrawn in 1983. Twenty sections were subsequently sold at a very good prison. On the first floor of the Eiffel Tower, you can take a look at one of the remaining pieces of this historic staircase. It measures 4.30 meters high. Discover that throughout the outside passage.
