This section provides information on the latest Cisco Unified Communications Manager (Unified CM) devices available for: Unified CM 14.0 (1) Unified CM 12.5 (1) Unified CM 11.5 (1) Unified CM 11.5 (1) A package of devices introduces new types of phones into unified CM and installs the firmware and configuration files that enable functions on your Cisco device. The new functions may be deactivated by default and have attributes or settings that you must set. Device packages are available on the Cisco Unified Communications Manager software download page. To get a package of devices, click the Unified CM device Pack link on the table and a new browser window or tab will be opened. You will need to log in to Cisco.A device package to all its unified cm servers, starting with the editor server and the TFTP server. When you apply a package of devices to enable compatibility with new devices, you do not perform a reboot at the clump level for unified cm 11.5 (1) or later. Instead, after Add the device package, do the following in Unified cm: Restart the Cisco Tomcat service in all ClAster nodes. If you are running 11.5 (1) SU4 or lower, 12.0 (1) or 12.0 (1) SU1, restart the ClAster. If you are running 11.5 (1) SU5 or higher, or 12.0 (1) SU2 or higher, restart the Cisco Unified Communications Manager service on the Editor node. However, if you are running the Cisco Call Manager service in the Subscriber nodes alone, you can skip this task. For more information on how to install a device package, see the installation guide of the Cisco Unified Communications Manager device package. For the Cisco Unified Communications Manager 12.5 (1) SRX firmware version, no additional telephones are disapproper. For the Cisco Unified Communications Manager 12.5 firmware version, no additional telephones are disapproper. Starting from the Cisco Unified Communications Manager 12.0 firmware version, the following telephones are not compatible: Cisco Unified IP Phone 7970g Cisco Unified IP Phone 7971g-GE Cisco Unified Phone IP Wireless 7921g Starting from Cisco Unified Communications Manager Firmware Launch 11.5 and later, the following telephone phones are not compatible: Cisco IP phone 12 SP * and related models Cisco IP Telus 30 VIP and Related Models Cisco Unified IP Phone 7902 Cisco Unified IP Phone 7905 Cisco Unified IP Phone IP 7912 Cisco Unified Wireless IP Telus 7920 Cisco Unified IP Conference Infrence 7935 Previous disapproved telephones continued supported by previous versions of administrators unified communications. However, when you upgrade to a launch of a unified communications manager that does not support disuse, the telephones will not work after the update is completed. Disapproved telephones are And after depreciation, the telephones are not compatible with future versions. This section provides details about the packages of compatible devices for Cisco Unified Communications Manager (cm unified) 14.0 (1) version. Each row in a table provides the package of the device. device. for a particular device and firmware version. Unified CM device packages contain both configuration files and firmware files, except in some cases as indicated in the table. Table 1.
