Pros:Cons:Can edit from iPhone or iPadAvailable only for Apple devicesAll features are free including basic editing toolsLimited advanced editing featuresTemplates included for professional-grade trailers Blender Blender Best for open source 3D creation Blender is unlike many of the free video editing software listed here because it's focused on open source 3D creation. It can be used for rendering, modeling, sculpting, animation, 2D concept design, visual effects, simulation and more. In addition to all of these features, the built-in video sequence editor allows you to make basic edits including cutting, splicing, masking and color grading. To check out a full list of features available for free with Blender, visit the company's website. Blender is completely open source, which means it's free to use for any purpose. You can learn more about the software's license online. If you're ready to download Blender and try it out for yourself, visit the download page here. Pros:Cons:The software is open source, which means it's completely free to use for any purpose.The interface isn't as easy to use as some competitors'.In addition to video editing tools, Blender allows you to create and edit 3D elements.If you're just looking to make basic video edits, the features on this software may be more than you need.The online manual makes it easy to get started and learn the software. OpenShot OpenShot Best for simple edits Similar to VSDC and VideoPad, OpenShot provides access to a free video editing software that's simple to understand and easy to use. According to the website, it's quick to learn and surprisingly powerful. A few highlighted features of the free video editing software include the fact that it's available on multiple platforms (Windows, Linux and Mac OS) in 70 different languages. The user interface is simple, which allows beginner and intermediate content creators to easily edit video. There is no pro version of the OpenShot software, which means every feature is available for free. You can use the software to trim and slice footage, add animation and keyframes, layer as many elements as you need, add video effects, text, animations and more. For a full list of features, visit OpenShot's website. Pros:Cons:All features are available for free.There isn't a huge selection of advanced editing tools.The interface is user-friendly and easy to learn how to use.The software may lag occasionally.The software includes all the basic features that you'd need to make simple edits. Movie Maker Online Movie Maker Online Best for making quick edits in your browser If you don't want to download video editing software, you can use a resource like Movie Maker Online. This free video editing website allows you to upload videos online, edit them and then save and export the finished project. If you just have simple and quick edits to make, Movie Maker Online may be the best free video editor for you. You can upload a clip to the website or choose from royalty-free stock media to get started. Then, you can trim, merge, rotate, blur and add additional effects. You can also add music, create a slideshow, adjust the speed and include transitions. To get started, visit Movie Maker Online. You can choose what you need to do and upload a video to begin editing instantly. You can also scroll down for helpful tutorials and instructions including a step-by-step guide on how to add files from various devices, how to edit clips and how to publish your project. Pros:Cons:You don't have to download any software to edit your videos.The advertisements on the website can be annoying,There is no paid pro version, which means you'll get access to all of the features for free.The timeline is vertical instead of horizontal and the whole interface looks different than most editors. The editor includes all the basic tools you'll need to make simple edits. There aren't many advanced editing features available. Promo Best for starting from a template Promo is another free video editing software that's worth trying if you're making promotional clips. The editor specializes in making promotional videos, Facebook ads, YouTube ads, Instagram ads and LinkedIn ads. Promo is completely online, which means you won't have to download any software to your computer to get started, and you can access it from anywhere. When you first sign up for the free plan, you'll see a variety of templates to choose from as well as the option to start from scratch. Promo has a huge collection of stock photos and videos that you can use in your project. You'll get personalized recommendations for what to use based on a short questionnaire you take when signing up. Unfortunately, the free version is limited to share links only, which means you can't download and distribute your videos but you can share them on social. Pros:Cons:You can start from a template or start from scratch.The free version is limited to share links only.You don't have to download any software to edit videos.A lot of premium features are reserved for paying subscribers.It's easy to add text, royalty-free media and music. WeVideo WeVideo Best for creating short videos online If you're looking to make a short video and you don't mind a watermark, WeVideo is a great free video editor to check out. While the paid versions of WeVideo start at \$60 annually, the free version may have all the features you need. The free plan allows you to publish up to five minutes monthly. You can create projects with drag and drop templates, record your screen, use your webcam and create a voiceover. The free version also allows you to create GIFs, videos and podcasts. Unfortunately, they will include a watermark. The editor itself includes a really easy-to-use interface and access to simple video editing features. But if you're looking to make more complex edits, this free video editor may be too basic. Many of the more advanced features are only available with a paid subscription. Pros:Cons:You can access WeVideo from any computer by visiting the website.A watermark appears on published work.You don't have to download any software and creating an account is fast and free.You can publish only five minutes monthly with the free plan.There's a free library of templates, transitions and backgrounds.The free version includes only very basic editing features. Final Thoughts Ultimately, I recommend trying out one of these free video editors before paying for professional software. If you're just looking to make simple edits, you'll likely find all you need with free video editing software. If you are looking for professional-grade editing tools, check out the free version of Lightworks, DaVinci Resolve or HitFilm Express. Alternatively, beginners may have better luck with an editor like VideoPad. Windows users can download VSDC Free Video Editor for simple projects while Apple users should check out iMovie before anything else. OpenShot is a great resource for simple edits on any platform while resources like Movie Maker Online, WeVideo and Promo completely operate in your browser. If you're using a wide variety of formats, Shotcut will likely support them all. And finally, if you're working on a 3D project, Blender is definitely worth downloading.
