Procreate calligraphy templates free.

Thank you! * Need help using the Procreate file? I wrote the word out in minimal strokes, focusing on this shift in pen pressure. 2. What Kind of Procreate Calligraphy Would You Draw? We have one point at the very bottom left and one point at the very top right. Whether you're looking for the best calligraphy pen Procreate can offer or you're looking for a collection of stylistic calligraphy Procreate brushes, check out these offerings from Envato Elements. In order to mimic a calligraphy aesthetic, we're going to need to be conscious of how and when we apply pressure to our brush. This means that my pen will let out a lot of "ink" when I press very, very lightly... Do not redistribute or sell. 4. Notice how we don't necessarily have to apply maximum pressure to get the maximum "ink" in this scenario. Sign up for my newsletter to get my free Procreate lettering brush + many more freebies! 1. There are many more Procreate brush settings for calligraphy, but these are ones you'll likely want to test out. Want to learn more about Procreate brush settings for calligraphy, creating, and customizing Procreate brushes? Working digitally can be such a fun way to recreate a calligraphic style for posters, T-shirts, and so much more. Love Procreate and want to learn more? 3. Now, let's dig into some of the basics of how to do calligraphy in Procreate. Procreate Lettering and Calligraphy Brushes If you like texture to your brushes, then you'll like this Procreate brush set. Making a duplicate brush can be handy, because then you can have both the original, default brush and your customized one saved for use. Step 6 You may also want to adjust the Maximum and Minimum Opacity, especially if you want to mimic an ink or watercolor look and feel. How to Use Procreate Calligraphy Brushes Step 1 There are a lot of awesome Procreate brushes out there, but it's helpful to understand your brush settings. In here, we can adjust our Brush Behavior. Step 3 But how in the world do you get it to come out perfectly, especially without guidelines? It can also vary depending on the look that you're going for. Follow along with us over on our Envato Tuts+ YouTube channel: 1. The higher the value, the smoother your lines will be. Step 4 Use the Drawing Pad, on the right side of the Brush Studio, to test this setting out (Tip: You can clear the Drawing Pad by clicking the Drawing Pad button and selecting Clear Drawing Pad). For example, here's another possible Pressure Curve you could use. In this case, my lines get thick pretty quickly and easily, but there's still taper here to my strokes. The results are awesome. We've got free Procreate tutorials you can check out right now, here on Envato Tuts+. The spot at the end of the line is where I lifted my pen, because it was a light press. This means that if I press softly, there won't be much "ink", but if I press really hard, there will be a larger stroke. Is it really just a matter of writing out the type, over and over again? This way, you can get the most out of your brushes and customize your results to meet your needs. This is where we'll draw our letters. Fall Themed Practice Sheets Click Here to Download Fall Themed Procreate Sheet Want more lettering + calligraphy practice sheets for Procreate? One thing I like to do is practice a few times, and even draw out my composition with a pencil, in Procreate, beforehand. This is an awesome download because it also comes with handy guides to help you practice and place your letters. Check out some of the sample strokes in the previews. Looking for Procreate Calligraphy Brushes? Step 6 However, our Pressure Curve doesn't have to be this simple. Step 4 The resulting graph is our Pressure Curve. In this graph, there's one point at the very top left and one point at the very bottom right. Yes, brushes make a big difference here, but so does the Pressure Curve. For example, on a new layer, I sketched out a calligraphy template Procreate design. How to Adjust the Pressure Curve Step 1 If you jump right into Procreate without adjusting any settings, you might not necessarily get the lines you're looking for. Do not copy, modify, or alter files in any way. Note, this is just one possible way you could do this, not the only way. Give this set of 20 brushes a try. Swipe left and select Duplicate. Checking out the differences can help you understand how this graph works and how to customize it. We can create extra points on our Pressure Curve's graph by tapping on the line. That might vary, based on how much pressure you like to use when you're drawing. Not for commercial use. Now that we've explored how to do calligraphy on Procreate, what would you create? I only recommend and promote the products I use and love.* One of the most popular apps to use for calligraphy and lettering is Procreate. Basic Strokes Click Here to Download Basic Strokes Worksheets 2. Valentine's Themed Practice Sheets Click Here to Download Valentines Procreate Sheet 10. We won't go into creating an entire calligraphy Procreate brush from scratch, but there are Procreate brush settings for calligraphy that are very helpful to know. In this example, I started the stroke soft-handed at the bottom, pressed hard, and then lightened the stroke at the end. As we move towards our maximum amount of ink, the transition gets much more dramatic and harsh. Click here for instructions. The Pressure Curve determines how Procreate reacts to the pressure you apply to your pen. This is going to act as my calligraphy template Procreate design. Step 5 Create a New Layer by clicking on the Plus Sign in your Layers. 2. Twentyletter Calligraphy Brush Procreate Set Here is another lovely set of Procreate calligraphy brushes, perfect for experimenting with hand lettering. It is recommended that you also use an Apple Pencil for its pressure sensitivity (Generation 1 or 2, depending on your iPad model). So what does this graph mean, and how do we edit it? How to Do Calligraphy in Procreate Step 1 Now that we've tested out these different settings, let's give them a test run. Visit the original post if you want to grab the printable version by clicking on the images! All files are Copyright ©2021 Kelly Sugar Crafts, and are for personal use only. I like to draw a sample line with varied line weight and then adjust these values to see the line contrast it will give me. I set my Maximum Size to 70% and my Minimum Size to 5%. If sharing, please link back to this blog post and not to the direct download link. The bottom of the graph, your x-axis, is your pressure. You don't have to redraw to see the effects of your settings either. Firsttype - Procreate Lettering Brushes Love hand lettering? Choose the values that you like best. This is a huge deal for any type of drawing in Procreate, but it's especially important if you're looking to do hand lettering. Yes and no. Step 3 Tap on your brush to go into the Brush Studio to customize it. Note: Make sure your Pressure Curve is where you'd like it to be. Chose the values that you prefer. Step 6 Now, when I draw my lines, I have some guides to help me place them, but the harder I press, the less linework I'll see. It's unlikely someone would want to work this way, but give these values a try. For example, let's use the Brush Settings we've already explored. It looks like a wrench icon. Try them out in your Procreate drawings and embellishments too. Here's a sample of what my lines look like in a simple, looped shape. Instead of simply pressing harder or softer, we can tweak how this transition from hard to soft or thick to thin plays out. See how this could also be used to create your own Procreate calligraphy practice sheets? Sweet Style Click Here to Download Sweet Style Sheets 7. Step 7 So what's the best Pressure Curve for calligraphy on Procreate? Likewise, we can use a test line with varied pressure applied to test out how these values look. First, under your Stroke Path, check out StreamLine. This is a really important setting, because it smooths out your lines for you. You can also create your own Procreate calligraphy practice sheets this way. I like to do this to plan out my design first, but if you prefer to freehand your work, that's great too! Step 4 Then, I can lower the opacity on my sketch, in my Layers panel. I kept my Maximum Opacity at Max and my Minimum Opacity at 1%. Here's what it looks like. Auld Inks Lettering and Calligraphy Brush Procreate Set These ink brushes are an awesome choice for a number of projects, including hand lettering and calligraphy. For example, using those settings, pressing lightly on upstrokes, firmly on downstrokes, here's a sample of the word "hello". Start by opening up your Brush Library, which you can do by clicking on the brush icon. So, for example, the left would be hardly any "ink", while the right would be the maximum amount. Let's illustrate what this means with an example. Draw a line, then tweak the settings, and the line will change to reflect these new values. Step 5 Next, let's take look at our Properties. So, to achieve that effect, our line needs to adjust based on how hard we press on our pen. Take a look at your Maximum and Minimum Sizes. The harder the press, the darker the line. We can add extra points by tapping on the graph. Procreate is a digital medium, so we have the luxury of undo and layers. However, if you're looking for extra content, check out these resources: Procreate Brushes on Envato Elements Paper Textures on Envato Elements These can be perfect additions, once you've given the basics a try. This Pressure Curve tells Procreate that we want our line to start really thin, with a gradual transition in the beginning. Start Type - Procreate Brush Set This hand lettering starter kit is a wonderful choice if you're new to Procreate calligraphy and hand lettering. How to Bounce Lettering + Sheets Click Here to Download Bounce Lettering Worksheets 3. This makes it a lot easier to focus on the pen pressure, rather than blind placement of the strokes. Take a look at this sample lettering, created with these techniques and settings. Many calligraphy styles rely on varied line width in a single stroke. It comes with 20 brushes, each with different textures and qualities. Here's a basic Pressure Curve. Want my free lettering Procreate brush to practice with? Begin by tapping on your Actions, at the top of Procreate. Procreate has a category called Calligraphy by default. Step 2 Let's start by making a Duplicate brush of the Brush Pen within the Calligraphy Brush Library. Here's an example of how these lines work in action. Notice how the line in the Drawing Pad has changed to reflect these values. Months of the Year Click Here to Download Months Practice Sheet 8. When drawing upwards, I press lightly, and then I press down firmly when drawing strokes downwards. This can be a handy way to use and create guidelines. Step 2 Next, tap on Prefs, while your Actions are expanded. Step 3 Then, tap on Edit Pressure Curve.
