APK Link – Download DOWNLOAD Among Us MOD APK (Unlocked, Always Impostor) Android Version: 4.4 and up Category: Action Game Ratings: 4.5 Size: 63MB Mod Feature: Unlocked, Always Impostor Download APK MOD Download From Playstore Points to Remember: Turn on Mod from Mod menu – go to settings > apps > game name > permissions and allow all permissions and “draw over apps” permissions Game Description: Amongus is a multiplayer game of 10 people wherein you and your friends are in charge of a spaceship that contains many different operational rooms designed with particular tasks and your job is to complete the tasks on this spaceship in order to win the game. But, at the beginning of the game, the system assigns certain people as the imposters, and their job is to sabotage these tasks so that the crew members cannot complete them to win the game, as well as kill the crew members whenever possible. Every time a crew member is killed, an emergency meeting is called upon discovering the body and the members come together to decide who they think is the impostor and kick them out to space. The advantage that the crew members have is that they are larger in number against either 1-2 imposters. Every crew member, along with completing their tasks, need to be on the lookout for the potential impostor. In the event of a doubt, the crew members can call an emergency meeting in order to discuss the potential impostor in the chat room. The impostor’s job is to throw them off and shift the blame on the crew members and get them kicked out of the spaceship in order to win the game. Whenever a member gets kicked out, the game reveals whether the player was an impostor or not. The advantage that the imposters have is that they have an upper hand over the control of the spaceship, they can sabotage different functions of the spaceship, some that can be solved easily and some that need immediate solving, or else the imposters win. For example, if the imposters sabotage the oxygen system and if it is not fixed immediately, the oxygen on the ship runs out and the impostor wins. The imposters also have control over certain gates and entrances in the spaceship in order to trap the crew members and kill them. The imposters also have exclusive access to special vents/tunnels in the space ship which allow them to move from one section of the ship to another strategically without being spotted by the crew members. In the event that someone gets kicked out of the spaceship or dies, they come back to the ship as ghosts. The ghost of a crew member can still finish their remaining tasks, but they don’t have access to the discussion chat anymore as otherwise, they would reveal the identity of the impostor. The ghost of an impostor can no more kill the crew members but can still sabotage the predetermined areas of sabotage on the ship. Thus, it essentially is a race between finding the imposters and completing the tasks before the imposters kill the crew members. The game is free to install and play, but you can choose to pay real money for some extra items, which will charge your Google account. You can disable in-app purchasing by modifying your device settings. Download Among Us MOD APK Latest Version free for Android. App Name Among Us Publisher Innersloth LLC Google Play com.innersloth.spacemafia File Size 122 MB Version 2021.5.12 (Latest) MOD Features Unlocked All, Show Crew/Impostor, No Kill Cooldown, MOD Menu... [Details] Requires Android 6.0 and on Category Action Download Among Us is an extremely attractive multiplayer action role-playing game of the publisher Innersloth. Inspired by the popular boardgame game Werewolf, the game has the main theme revolving around the teamwork, beliefs, and doubt of a group of astronauts in space. There, the group of astronauts must find a way to launch the ship to leave space. However, there have been a few murderers infiltrated the crew with the intention of destroying all. Will the fate of the astronauts be like? Among Us’s background takes place in a spaceship in space, where the astronauts in the ship must try to find a way to launch the ship to leave space. However, among the crew, there are imposters infiltrating the ship to sabotage the ship. They can destroy the ship, cause chaos and divisions, even kill people. Therefore, the goal of the astronauts is to find anonymous impostors to depart the ship before it is destroyed. Surely you are too familiar with the game Werewolf, so Among Us’s gameplay does not need to mention too much. And even for beginners, the rules are not too difficult to understand. Because to win, understanding the law is only part, it is important that you have to reason quickly, put your faith in the right place, even deceive people if you are a murderer. Among Us requires the flexibility and intelligence of the player, not too high on skill. In addition, with werewolf-like games, if there is a group of friends to play with, it is extremely interesting. You will have hours of fun and learn more about each other. Starting to play, you are randomly assigned to play your role in one of the two camps. Either side, if you want to win, you have to do well with your goal and mission. For the Astronaut faction, win by completing the missions to launch the ship or chase all the imposters. However, it was not easy to find the impostor immediately. Because it is not easy for them to reveal their identity anytime soon. Only when vandalism and murders occur will the astronauts have the clues about the impostor. When vandalism occurs, they can repair the damage or report it if any corpses are found. Astronauts can hold an emergency meeting to discuss suspicious behavior and vote to get rid of the suspects. Remember the ultimate goal is to eliminate impostors and launch the spaceship. As for the Impostor, please do everything to destroy all the Astronauts. To do this, it is first necessary to deceive people by pretending to perform tasks and chatting like real astronauts at discussions. They could then create vandalism to cause chaos and split the crew. Find vents or sneak into rooms to kill crewmembers in silence. It is quite difficult for the Impostors because they have less numbers but if you create divisions and kill the key figures of the Astronaut faction, victory will be easier for you. It can be said that the play style of boardgame games is often very interesting, especially when there are many players. With Among Us, depending on the number of players, you can choose to add an impostor, add quests, ... to make the game more interesting. However, the coolest feature is still playing with friends. Among Us is a multiplayer game and it allows 4 to 10 people to play together. There are 3 different maps including: a spaceship (The Skeld), a headquarters building (Mira HQ), or a planet base (Polus) where the game can take place. The game can take place in a spaceship (the Skeld map) In-game, there are 2 factions with clear missions: Crewmates (or normal people): there will be some tasks for them to complete. They are mostly relevant to maintenance work on vital systems, such as electrical rewiring and fueling engines. Crewmates will take the tasks in the form of minigames. Impostors (or the killer): they also have tasks that are fake. Impostors will be chosen randomly and each game will have from 1 to 3 impostors depending on how many players in that match. The impostors can go through vents, destroy the system or kill other people. When a dead body is reported, there will be a group meeting and everybody will discuss to find out who the murderer is. Then, everyone will vote for the person that they believe is an impostor. If a plurality vote is reached, the chosen person is ejected from the map and dies. The game will finish if one of 2 factions is the winner. Crewmates can get the point if they can find out all the impostors or finish the tasks before being killed. On the other hand, Impostors will win if they kill enough Crewmates until the number of 2 sides is the same or have a sabotage countdown run out.
