The Voice Google service is an excellent alternative if your local cart simply doesn't work for you. Related: How to configure the call waiting on Android 6 The best Voicemail apps for Android - (Visual Voicemail) How to configure the call on android: 3 Way methods to configure Voicemail on Android Watch the video below to configure Voicemail on Android. The following Android voicemail configuration are some ways to set up the answering machine on Android. Carrier Voicemailgoogle Voice Carrier Voicemail This is the only method available for users who want to use the Voicemail service provided by their vectors. If you want to set the base mail on your Android smartphone, you can easily configure it using this method within a couple of minutes. Using this method, you can direct calls to your Voicemail service and can retrieve the messages later. Due to different vectors and firmware, this method may be slightly different for some Android devices, especially when setting up a PIN and a greeting message. Open the settings app on your Android, tap device on call settings and select Voicemail. Touch Call Settings and select Voicemail. Touch the Voicemail service and select my courier or my operator. Touch the Voicemail service and select My Carrier TAP On Setup, select the number of voicemail and type your answering number. On some devices, you see the voicemail settings instead of configuration. Touch OK after entering your voice mail number. Tap Setup, announcement The telephone answering number and press OK Tap OK in the modified popup VoiceMail Number. Touch OK in the voicemail number popup modified number Open the phone app or dialer and hold the One button until the device does not call the Voicemail service. Keep button 1 on the dialer until the device does not call the Voicemail Service service, enter a PIN or password when prompted by the voice command.Record your name speaking when prompted by the voice command. Share the default greeting message or register a new one When requested by the voice command. Follow the voice commands to change additional settings. This will depend on different vectors. This to! Your carrier's Voicemail service has been configured successfully and configured. Google Voice Google Voice is the official way to call and receive calls from your Google number. It is one of the most popular vocal call services currently available for Android which also has a completely functional voice mail service. This method focuses on the use of an alternative voice mail service to traditional Voicemail services of the carrier and Google Voice Probably the best option. Not only does the service offer a massive storage and security space, but also includes several additional features. Perhaps, the best thing about this method is that you can access the postal vowels via SMS, e-mail, the official Gmail website and the Google Voice web page. You can also record a personalized greeting for different contacts. You still need a Google number and an account to forward calls. 1. Google number First of all, you need a Google number if you don't already have one. Get and enable a new Google number takes takes a couple of minutes. While the Google Voice service is only available in certain countries, you can overcome this by using a VPN or proxy service. Open the Google Voice official Web site on your PC and log in with your Google account. After logging in, you'll be taken through a few steps to get a number.Tap on a Google I want a new number. Select an option I want a new number. Choose your desired number of Google. You can search by area or zip code. Select your favorite number from the results list and click Continue. Select your favorite number and hit continue Enter the desired PIN number to enter the PIN and Confirm PIN text boxes. Make sure you accept the terms VoiceA Google e s by selecting the check box I accept and click Continue. Enter your PIN code and select Continue Enter your current number to be used as a forwarding number, and click Continue. This number will sound when someone calls your number to Google. Type the current number and click Continue In verify your pop-up on your phone, click Call Me Now. You'll now receive an automated call from Google Voice. Enter the code shown in the popup when prompted by voice command on your Android device. After entering the code, the call is automatically disconnected once the code is verified. Select a call to me Nowa verification 2. Set up Google Voice and voicemail After obtaining and allowing the new number from Google, you need to configure your voice mail service Google Voice and Google e s on your Android device. If you haven't used Google Voice before, then follow the instructions below to configure your new Google Voice account on your Android device. Download and install the Google Voice app on your Android device. You can obtain an application from the Google Play button at the bottom. Open the application and tap Next on the welcome screen. Install Google Voice app and tap Next Sign in with your Google account, and tap Sign In. Add your Google account data and hit Login Tap Next on the Google Voice setup screen. Tap Next on the Google Voice setup screen Under the calls with Google Voice screen, select the desired option and tap Next. You can choose between using Google Voice to make all calls, use it to make international calls, wondering before each call and do not make calls via Google Voice. In making the call window, select the desired option and press Next Now the voice setup screen should appear. Touch Next. Tap Next on the Setup screen voicemail Press Setup to set the answering service. At this point you will receive an access request popup. Touch Allow. Press Setup to complete setup Google Voice voicemail Select from the pop voicemail. On the pop-answering service, select Google Voice Wait for Inbox synchronization to complete. Now you will be displayed in the Inbox screen, where all voice messages are available. You can listen to these voice messages by touching individual messages. List of all the available voice messages 3. Configuring Voicemail This last part focuses on the answering service configuration and customization settings that are currently offered by the answering service of Google's. While the voicemail service should work normally if you've followed the steps above, you can change things like the Name and greeting message for the answering service, as would you do on a traditional answering machine support service. Open the Google Voice web page on your PC and log in with your Google Account.Click on the wheel icon at the top right and select Settings. Go to Settings on Google Voice Web page Click on the Voicemail & Text Tab.Click on Record New greeting message. You'll get a new pop-up ad. Click Record New ad Enter the greeting name and click Continue. Enter the greeting name and hit you to continue You'll time receive a call from Google to your Android phone. Talking and registering your desired greeting Message.The registration will now be available under the Secretariat & Text Text Next to Voicemail Greeting and you can choose it by selecting the recent recording from the drop-down menu. Check the recording available in voicemail and the text card you can also change other options from the Voicemail and text card as name, PIN, transcriptions, notifications and text forwarding. This to! Has been successfully enabled and configured the Google Voicemail service on your Android device.: Suggested readings: The most economical VoIP 5 phone service - Quality service in the budget How to quickly set Samsung Pay On Galaxy Watch in 2 minutes How to set up to Paypal account on Android in 2021 people also ask Voicemail to retrieve messages from unanswered calls. People can always leave you a voice message in your answering machine. Furthermore, the blocked contacts are forwarded to voicemail, preventing you to accidentally collect their calls. To find the answering machine on Android, open the Dialer app and press and hold the number 1 key until you see the answering machine on the screen. For the visual answering machine, head to phone> Voicemail Visual> Manage the answering machine. Yes, Samsung phones are equipped with an integrated visual voicemail app. Conclusion The verdict: ultimately, method 1 is for a simple set of vector vocation services. If you find it expensive, then we highly recommend Google Voice as an alternative. In addition, Google Voice offers much more than a basic voice mail service. Whatever the method you choose, make sure you follow all the instructions on how to configure Voicemail on Android and feel free to click here below. Kris Carlton / Android Authorityvoicemail is a characteristic so essential, but many people have not configured us simply because they don't think about it. Unless you generally call every missing call, it is useful to allow important callers to leave a voice message to know who you need to recall and those who could be a telemarketer. It takes less than five or 10 minutes to configure your voicemail system. Is worth. Check how easy the process is to set voice mail to Android phones. See also: A 10 best calendars apps for Android How to set Voicemail on AndroidFirst, you want to open your app by embedded phone. Get the dial screen and press and hold number 1 to start a call to the Voicemail service. If you have already set your answering machine, the PIN will be requested; You can reset your PIN if you have forgotten it, but the process varies for providers. If you have not set up your answering machine, you will hear a message that states, A e a, ~ "New Voicemail is stored on paper. A, a, ~ Follow the requests you feel to complete the configuration of the Voicemail service on your phone Android. After completing the configuration of the Voicemail message, try pressing and holding 1 again and verify that your answering machine works properly with the password you chose. Furthermore, you are ready to receive vocalizations! If you also have the Voicemail app Visual Voicemail, which is natively supplied with most of the new Android devices, see a pop-up notification for this app when you get a voice message. Personally, I prefer to manage my voicemail in the Visual Voicemail app instead of composing to listen and Manage my voicemail. Detailed instructions are detailed instructions: Open the phone app. Press and hold number 1 to call The Voicemail service. You will be asked a PIN if your vocal message is already set. You can reset it if you forgot it.
