You can easily add and modify the audio including music and voice - It is not available for Linux.You you can export videos directly to YouTube and other social media. iMovie iMovie Best for Apple Users iMovie is a great option for MacOS and iOS users. The app is completely free to download and has a 3.4 rating in the App Store. iMovie comes with a variety of preloaded models to choose. At the time of writing, there are 29 trailer models that you can customize with additional logos, names and media. In addition to trailers, you can change movies from zero to a resolution up to 4K using videos from your iPhone, GoPro or other Ultra HD camera. In the app, you can add titles, transitions and 3D visual effects. It also creates a soundtrack from the built-in music library and sound effects or import songs from iTunes or Giadrageband. You can also record voiceovers directly to iMovie. Once you have performed your video, you can export it optimized for YouTube, Facebook and other social media platforms. You can also share any video frame as an image directly from your Mac or iPhone. If you like the modification of your iPhone, Apple Clips is another free video editing app that is worth checking. € Pro: Cons: You can change from iPhone or iPadadavailable only for Apple Device The functions are free of charge including Basic Change Advanced Advanced Change Change Tools. vGrade Trailers Blender Blender Best For Open Source 3D Creation Blender is different from many of the free video editing software listed here because it is focused on Open Source 3D creation. It can be used for rendering, modeling, sculpture, animation, the 2D concept design, visual effects, simulation and more. Also to all these features, the integrated video sequence editor allows basic changes, including cutting, junction, masking and evaluation of color. To check a complete list of features available for free with Blender, visit the company's website. Blender is completely open source, which means that it's free for any purpose. You can learn more about the online software license. If you are ready to download Blender and try it for yourself, visit the download page here. Pro: Cons: The software is open source, which Which is completely free to use for any purpose. The interface is not easy to use as some competitors ". In addition to video editing tools, Blender allows you to create and edit 3D Elements. If you are not just trying to make basic video changes, the functionality of this software may be more than you need. The online manual makes it easy to get to get And learn the software. OpenShot Openshot Best for simple changes to VSDC and Videopad. OpenShot provides access to free video editing software that is simple to understand and easy to use. According to the website, it is fast to learn and surprisingly powerful. Some features highlighted with free video editing software include the fact that it is available on multiple platforms (Windows, Linux and Mac OS) in 70 different languages. The user interface is simple, which allows the creators of beginner and intermediate content to easily modify the video. There is no Pro version of the Openshot software, which means that every feature is available for free. You can use the software to cut and cut the movie, add animation and keyframes, level as many elements you need, add video effects, text, animations and more. For a complete list of features, visit the Openshot website. Pro: Cons: All the features are available for free. This is a huge selection of advanced editing tools. The interface is easy to use and easy to learn how to use. The software may late late. The software includes all the basic functionality you need to make simple changes. Movie Maker Online Movie Maker Online Best To make quick changes in your browser if you don't want to download the video editing software, you can use a resource like movie maker online. This free video editing website allows you to upload videos online, modify them and then save and export the finished d project. If you only have simple and fast changes to do, movie maker online could be the best free video editor for you. You can upload a clip on the website or choose from royalty-free stocks to start. So you can cut, merge, rotate, blur and add additional effects. You can also add music, create a slideshow, adjust the speed and include transitions. To start, visit movie maker online. You can choose what you need to do and upload a video to start the modification instantly. You can also scroll down to tutorials and useful instructions, including a step-by-step guide on how to add files from various devices, such as editing clips and how to publish the project. Pro: Cons: You don't have to download any software to change your videos. The advertisements on the website can be annoying. It is not a Pro paid version, which means that I would have access to all the features for free. The chronology is vertical instead of horizontal and the entire interface seems different from most editors. The editor includes all the basic tools that you need to make simple changes. There are no many advanced editing features available. Promo better to start from a model promotion is another free video editing software that is worth trying if you are making promotional clips. The publisher is specialized in making promotional videos, Facebook advertisements, YouTube ads, Instagram ads and LinkedIn announcements. Promo is completely online, which means you didn't have to download any software on your computer to start and you can access it from anywhere. When you register for the first time for the free plan, see a variety of models to choose from as well as the possibility of starting from scratch. Promo has a large collection of photos and videos that you can use in your project. You will get customized recommendations for what to use based on a brief questionnaire you take when you sign up. Unfortunately, the free version is limited only to the links to share, which means you can't download and distribute your videos but you can share them on social. € Pro: Cons: You can start from a model or From scratch. The free version is limited to share only the links. You don't have to download any software to edit video. Many premium features are reserved to pay subscribers. It's easy to add text, royalty-free medium and music. Wevideo Wevideo better for creating short videos online If you are looking to make a short video and you don't mind a watermark. Wevideo is a great free video editor to check. While payment versions payment Wevideo starts at \$ 60 a year, the free version could have all the features you need. The free plan allows you to publish up to five minutes minutes. You can create projects with drag drag patterns, register the screen, use your webcam and create a focus. The free version also allows you to create GIF, VIDEO and PODCAST. Unfortunately, they will include a watermark. The editor itself includes a really easy to use interface and access to simple video editing features. But if you are looking to make more complex changes, this free video editor may be too simple. Many of the most advanced features are only available with a paid subscription. PRO: Cons: You can access Wevideo from any computer by visiting the Website. A Filigree appears on the job published. You don't have to download any software and create an account is fast and free. You can only publish five minutes away with the free plan. The free library of models, transitions and wallpapers. The free version includes only basic modification functionality. The final thoughts in the end, I recommend trying one of these free video editors before paying for professional software. If you are just trying to create simple changes, you will probably find everything you need with free video editing software. If you are looking for professional quality editing tools, see the free version of Lightworks, Davinci Resolution or Hitfilm Express. Alternatively, beginners can have a better fortune with a editor like Videopad.Shan, Windows users can download the free VSDC video editor for simple projects while Apple users should check iMovie before anything else. OpenShot is a great resource for simple changes on any platform, while resources like online cinema cinema, Wevideo and promo work completely in your browser. If you are using a wide variety of formats, the box will probably support them everything. And finally, if you are working on a 3D project, Blender is definitely worth downloading.
