Jefferson students, working with a faculty supervisor and AISR media and instructional specialists, have created a series of dissection videos as an educational support resource to help students learn anatomy. Sections have been completed each year, starting in 2005, as part of Jefferson's Summer Computer Fellowship Program, sponsored by the Dean of Jefferson Medical College. This is an on-going program; additional videos will be completed in subsequent years until the dissection series is complete. Advisors include Richard R. Skip to main content Medical school at Jefferson Medical College begins with a 12-week course titled "Human Form and Development," which consists of Human Anatomy and Embryology lectures and Human Anatomy lab.
